Amir Kashani

Senior iOS Engineer — Digital Car Key & In-Car Connectivity

Munich, Germany kashaniamirabbas@gmail.com github.com/aakpro linkedin.com/in/amirabbaskashani

PROFILE

iOS engineer with 13 years of experience, now building digital car key and in-car connectivity features at Quartett mobile, a CARIAD (Volkswagen Group) company: remote keyless entry on Apple's CarKey framework (live in myAudi since 2025), Apple Wallet car-key flows, and a shared C++ Bluetooth LE core for iOS and Android. Previously iOS Chapter Team Lead for Filimo (1M+ iOS users), co-founder and CTO of a salon-booking marketplace, and the only iOS developer on Sheypoor's three-month app rebuild.

CORE STACK

Digital Key & Connectivity: Apple CarKey (RKE) · Apple Wallet car keys (PassKit) · CCC Digital Key 3.0 · Bluetooth LE · Shared C++ core

iOS & Languages: Swift · Objective-C · Modern C++ · SwiftUI · UIKit · Combine · Swift Concurrency · GCD · Python

Architecture & Quality: Modular Clean Architecture · MVVM · Automated regression testing · CI/CD

Media: AVFoundation / AVPlayer · HLS adaptive streaming · Offline downloads with DRM · Multi-CDN failover

Languages: English (C1) · German (B1, courses through B2.1) · Persian (native)

EXPERIENCE

Software Engineer (iOS) · Quartett mobile

NOV 2022 — PRESENT

CARIAD (Volkswagen Group) company · myAudi, now also Porsche, VW, SEAT, CUPRA and Bentley apps · Munich

- Implemented remote keyless entry in the **myAudi** iOS app on Apple's **CarKey** framework, from opening RKE sessions to lock/unlock actions, status and error handling; live since **2025**.
- Built the iOS flows for **Apple Wallet car keys** (CCC Digital Key 3.0): provisioning through PassKit, owner pairing, key sharing and key management, working with ECU, firmware and backend teams.
- Developed the **Bluetooth LE** part of automatic smart entry.
- Co-developed a shared **C++ Bluetooth LE core** (iOS and Android) linking phone apps and rear-seat entertainment screens to the car's infotainment unit.

iOS Chapter Team Lead · Sabaldea Group

MAR 2020 — OCT 2022

Filimo, Televika, Zabia, Aparat Sport, Filimo School, Aparat Music · Video streaming

- Led the iOS chapter of **5–8 engineers**. Filimo's iOS app had **1M+ users** and **~400K subscribers** (Filimo overall: 15M+ users, 5M+ subscribers). Started on Filimo, later covered all six apps.
- Moved the iOS apps to modular **Clean Architecture with MVVM** and added regression tests, so teams could ship in parallel.
- Cut video startup from **4–5 seconds to about 1 second** in our in-house AVPlayer-based player, using custom bitrate selection, multi-CDN failover and buffer pre-warming.
- Made image-heavy catalog screens load faster and scroll at **60 fps**.
- Integrated a commercial DRM for offline downloads, and designed the watch-history sync protocol with the backend team.

Co-Founder & CTO · BeautyTime

NOV 2017 — MAR 2020

Salon booking marketplace for customers, scheduling software for salons

- Designed the product and system architecture: map-based salon discovery and booking for customers, real-time scheduling for salons.
- Launched on **web, iOS and Android within 4 months**; grew to **9,000+ peak daily users** across the site and apps.
- Led a **6-person team** across engineering, product, marketing and operations.

iOS Engineer → Senior iOS Engineer · Sheypoor

AUG 2015 — OCT 2017

Classifieds marketplace (350+ employees) · iOS

- Rebuilt the Sheypoor iOS app (v2) in **3 months** as the only iOS developer, ahead of a funding round.
- Worked with Android, web and backend teams on the v3 REST API and client caching; listings and app traffic grew after the release.
- Promoted to Senior iOS Engineer within **12 months**.

iOS Developer · ivysoft

JUN 2013 — JAN 2015

Consumer iOS apps, published on the App Store as Pichak

- One of three iOS developers on **Recordium**, an audio recorder featured by Apple and named one of The Next Web's Apps of the Year 2014.
- Helped move Recordium from paid downloads to freemium, with in-app analytics and conversion funnels.

FREELANCE & SIDE PROJECTS

- **Freelance iOS:** Rahavard365, Digipay and MusicMa.
- **Video tagging:** Python pipeline that extracts keyframes and uses the Qwen vision-language model to produce scene labels and taxonomy tags.
- **Crash triage:** LLM tool that maps crash stack traces to the relevant code and its git history to suggest likely causes.

EDUCATION & ACADEMIC WORK

Education

M.Sc. in Information Technology (E-Commerce) — Iran University of Science and Technology (2015–2018)

Thesis: Assessing the business value of big-data analysis in firms

B.Sc. in Software Engineering — Shahid Beheshti University (2008–2013)

Academic & Community Work

- **E-Commerce Laboratory, IUST:** Research, seminars and presentations on big-data analytics, text mining and social-network analysis.
- **SM-Art Robotic Group (2012):** Autonomous control algorithms for the RoboCup Small Size League.
- **Chanteh Group (2014):** Designed and taught a Swift development course.
- **SBU computer student association:** Member; selected association at the Harkat National Festival (2011).
