Amir Kashani

Senior iOS Engineer

13 years · former iOS Chapter Team Lead and startup CTO

Munich, Germany kashaniamirabbas@gmail.com github.com/aakpro linkedin.com/in/amirabbaskashani

PROFILE

Senior iOS engineer with 13 years of experience and deep expertise in connected-device apps (Apple CarKey, Wallet car keys, Bluetooth LE), video streaming at scale and modular app architecture. Main iOS developer of CarKey remote keyless entry in myAudi, working directly with Apple. Previously led an iOS chapter of 5–8 engineers for apps with 1M+ iOS users and was CTO of a 6-person startup. Works with coding agents and spec-driven workflows. Looking for Staff or Lead iOS roles.

CORE STACK

iOS & Architecture: Swift 6 concurrency · SwiftUI · UIKit · Objective-C · Swift packages (modular apps) · Clean Architecture · MVVM · unit testing · CI/CD

Connected Devices: Apple CarKey · Apple Wallet car keys (PassKit) · CCC Digital Key 3.0 · Bluetooth LE · shared C++ core

Media & Performance: AVFoundation / AVPlayer · HLS adaptive streaming · offline downloads with DRM · multi-CDN failover · 60 fps rendering

Agentic Engineering: Coding agents (Claude Code, Codex, Gemini CLI) · spec-driven development · review rules for AI-written code · local models (Qwen via Ollama) · Python

Leadership: Hiring · 1:1s and growth · planning with product · architecture decisions · code review and mentoring

Languages: English (C1) · German (B1, courses through B2.1) · Persian (native)

EXPERIENCE

Software Engineer (iOS) · Quartett mobile NOV 2022 – PRESENT

CARIAD (Volkswagen Group) company · myAudi app · Munich

- Shipped **Apple CarKey remote keyless entry** in the myAudi iOS app as its main iOS developer, working directly with Apple: RKE sessions, lock/unlock, status and error handling. Live since **2025**.
- Brought **Apple Wallet car keys** (CCC Digital Key 3.0) to Audi customers by building the iOS provisioning, owner pairing, key sharing and key management flows with ECU, firmware and backend teams.
- Shaped the digital key module's architecture so the same code can serve other Volkswagen Group brand apps (rollout in progress).
- Delivered the **Bluetooth LE** part of automatic smart entry.
- Co-developed one shared **C++ Bluetooth LE core** for iOS and Android, connecting phone apps and rear-seat entertainment screens to the car's infotainment unit.
- Review the team's code, onboard and mentor developers, and take part in architecture decisions.

iOS Chapter Team Lead · Sabaldea Group MAR 2020 – OCT 2022

Filimo, Televika, Zabia, Aparat Sport, Filimo School, Aparat Music · Video streaming

- Led the iOS chapter of **5–8 engineers** behind Filimo and five sister streaming apps. Filimo's iOS app reached **1M+ users** and **~400K subscribers** (Filimo overall: 15M+ users, 5M+ subscribers).
- **Hired 6+ iOS engineers** and ran the people side: 1:1s, growth, planning with product, chapter standards and performance management.
- Moved the iOS apps to modular **Clean Architecture with MVVM** and added regression tests, so teams could ship in parallel.
- Cut video startup from **4–5 seconds to about 1 second** in our in-house AVPlayer-based player, using custom bitrate selection, multi-CDN failover and buffer pre-warming.
- Made image-heavy catalog screens load faster and scroll at **60 fps**.
- Shipped offline downloads with a commercial DRM, and designed the watch-history sync protocol with the backend team.

Co-Founder & CTO · BeautyTime

NOV 2017 — MAR 2020

Salon booking marketplace for customers, scheduling software for salons

- Launched on **web, iOS and Android within 4 months** and grew to **9,000+ peak daily users** across the site and apps.
- Designed the product and system architecture: map-based salon discovery and booking for customers, real-time scheduling for salons.
- Led a **6-person team** across engineering, product, marketing and operations.

iOS Engineer → Senior iOS Engineer · Sheypoor

AUG 2015 — OCT 2017

Classifieds marketplace (350+ employees) · iOS

- Rebuilt the Sheypoor iOS app (v2) in **3 months** as the only iOS developer, ahead of a funding round.
- Worked with Android, web and backend teams on the v3 REST API and client caching; listings and app traffic grew after the release.
- Promoted to Senior iOS Engineer within **12 months**.

iOS Developer · ivysoft

JUN 2013 — JAN 2015

Consumer iOS apps, published on the App Store as Pichak

- One of three iOS developers on **Recordium**, an audio recorder featured by Apple and named one of The Next Web's Apps of the Year 2014.
- Helped move Recordium from paid downloads to freemium, with in-app analytics and conversion funnels.

OPEN SOURCE & FREELANCE

- **MacAudioRecorder:** macOS menu-bar recorder for system audio on ScreenCaptureKit. Fragmented MP4 keeps recordings playable after a crash or power loss; at most the last 2 seconds are lost.
- **MacDownloadManager:** macOS download manager in Swift 6 and SwiftUI with segmented parallel downloads, resumable transfers, a scheduler and bandwidth limits.
- **Freelance iOS:** Rahavard365, Digipay and MusicMa.

EDUCATION

M.Sc. in Information Technology (E-Commerce) — Iran University of Science and Technology (2015–2018)

Thesis: Assessing the business value of big-data analysis in firms · Focus: big-data analytics, text mining and social-network analysis

B.Sc. in Software Engineering — Shahid Beheshti University (2008–2013)
